

Whisper Clean[®] HEPA Air Diffuser

*For Secondary Air Filtration / IAQ
into Occupied Spaces*

FOR COMMERCIAL, MEDICAL & RESIDENTIAL APPLICATIONS

- ✓ Multi-use in commercial, medical and residential applications for hazardous materials removal, demolition, infection control, and /or general dust control
- ✓ Provides engineering redundancy of secondary HEPA filtration for infection control purposes in a hospital setting
- ✓ HEPA diffuser filter rated at 2,256 CFM 99.99% @ 0.30 micron

Provides Gentle and Quiet Secondary HEPA Air Diffusion into Sensitive Environments

*Works with any Standard
Negative Air Machine
(not included)*

*Removable Stainless
Grille for Easy HEPA
Filter Exchange
(Replacement filter
sold separately)*

Patent No.: US11,198,086 B2

ADVANTAGES:

- ✓ Beneficial for containment projects; helps deliver more ACH and manage the large volume project exhaust when maintaining negative pressure
- ✓ Ability to exhaust into occupied areas or where the exterior exhaust is not an option
- ✓ Reduction of labor; eliminate set up of exhaust ducting to the exterior building envelope
- ✓ Reduces energy loss by avoiding exhausting conditioned air
- ✓ Eliminate breaching the building envelope by removing a window for exhaust
- ✓ Improve jobsite and fire life safety on the project reducing long exhaust temporary ducting
- ✓ Gentle diffusion of air into occupied areas; removes "blast" of air from negative air machines going direct into occupied areas
- ✓ Reduces decibel level of the NAM exhaust by more than 20%
- ✓ Optional fire damper attachment for penetrating rated walls
- ✓ Easy to move. Works with a standard negative air filtration unit
